Campaign for Contraceptive Equity

In 2001, NARAL Pro-Choice Texas Foundation launched a campaign to educate the public and policy makers about the need to ensure that contraception is covered by health insurance plans just like Viagra.

NARAL Pro-Choice Texas Foundation led a coalition to establish contraceptive equity in Texas. The work of this coalition resulted in a new law requiring insurance companies to cover contraception prescriptions in the same way they cover other prescriptions. The bill took effect September 1st, 2001.

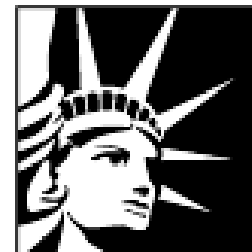

Pro-Choice Student Leadership

NARAL Pro-Choice Texas Foundation co-sponsors an annual student leadership training for students from 10 to 20 Texas campuses.

NARAL Pro-Choice Texas Foundation also sponsors a student leader on two to four Texas campuses per semester as part of our Choice Organizing Project. Students that participate in the program receive a stipend, educational materials and access to leadership development and other training opportunities.

OVERVIEW OF ACCOMPLISHMENTS

Who We Are:

NARAL Pro-Choice Texas Foundation, an affiliate of NARAL Pro-Choice America, is a statewide, nonprofit organization. NARAL Pro-Choice Texas Foundation's mission is to support and protect as a fundamental right and value, Texan families' ability to make personal and private decisions regarding reproductive health through public education, training, organizing, and research.

Our track record of accomplishments includes several successful public education campaigns. Highlights are listed below, starting with our most recent project.

Crisis Pregnancy Centers Public Awareness Campaign

NARAL Pro-Choice Texas Foundation launched this campaign to educate the public and policy makers about crisis pregnancy centers (CPCs) and whether they are an appropriate recipient of state family planning funds.

In December 2005, NARAL Pro-Choice Texas Foundation produced a report titled [Crisis Pregnancy Centers in Texas: A Hidden Threat to Women's Health?](#) that generated statewide news coverage. This report

highlights controversial new state funding for CPCs.

Emergency Contraception Access Campaign

NARAL Pro-Choice Texas Foundation launched a campaign in 2002 to help educate Texans about emergency contraception (EC) and to reduce barriers to access to EC.

NARAL Pro-Choice Texas Foundation published a county-by-county resource guide for reproductive healthcare titled [Where Will a Woman Go? A Guide to Reproductive Services in Texas.](#) This guide, which included a list of EC providers in Spanish and English, was distributed to rape crisis centers and social service agencies throughout the state.

As part of this campaign, in collaboration with the Institute for Reproductive Health Care Access, NARAL Pro-Choice Texas Foundation contacted over 600 physicians in selected Texas counties to provide them with educational materials about the importance of offering EC to their female patients. As a result of this outreach effort, NARAL Pro-Choice Texas Foundation succeeded in expanding the number of Texas counties where patients could access EC.

Access Texas: A Campaign to Improve Access to Reproductive Healthcare

NARAL Pro-Choice Texas Foundation launched this campaign in 2001 to conduct research and improve access to reproductive healthcare in Texas hospitals.

As part of this campaign, NARAL Pro-Choice Texas Foundation conducted Texas' first statewide survey of hospital emergency rooms to determine whether they were offering emergency contraception to survivors of sexual assault. The survey revealed that 67 percent of the surveyed emergency rooms did not offer EC to rape victims.

Also, NARAL Pro-Choice Texas Foundation conducted a survey of Texas' family practice residency programs to determine whether abortion training was routinely offered to residents.

In collaboration with the Women's Health and Family Planning Association of Texas, NARAL Pro-Choice Texas Foundation organized a medical abortion training for family practice physicians interested in integrating abortion services into their practices.
